

Galapagos

A trip to the Galapagos Island will be the journey of your lifetime. Located 1,000 km from the Ecuadorian mainland, the archipelago consist of 13 major islands, of which 5 are inhabited. Find out more about the famous Islands by taking virtual trip with us!

The Island's interesting volcanic geology, as well as its rich flora and fauna have been admired and studied by numerous travelers, scientist, and nature-lovers. Scientist are still faced with a mystery how such a large diversity of species could develop in a remote location like the Galapagos Islands.

On the Islands, a multitude of animals, by most people only known from the Discovery Channel, are romping about: the main reason for tourists and nature lovers to pay the Galapagos Islands a visit.

Interested who first set foot on the Islands? Whether it was the Incas, refugees, pirates, or seafarer who were seized with a thirst for adventure? Find out about the human history of the Galapagos Islands! Talking of men on the Islands: One of the first to visit was no less a person than Charles Darwin, who was fascinated by the natural history of the archipelago. His five-week stay gave the impetus to the famous Theory of Evolution.

The Galapagos Islands are blessed with pleasant weather all year round, which means that there is no "better" time to visit those precious Islands. Still, you might take some factors like High Season vs. Low Season, or the climate into account.

The Galapagos Islands won't leave you untouched. Travel with us and have the journey of your lifetime amidst playful seals, elegant albatrosses, fiery red Sally Light-foot Crabs, and sneaky Friate birds.
